DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I (claims 1-3, 5 and 6) in the reply filed on April 30, 2009 is acknowledged. Claims 4 and 7-14 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention.

Priority

2. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

3. The information disclosure statements filed on July 27, 2006 and August 23, 2006 have been received and the references listed thereon have been considered.

Oath/Declaration

4. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

(a) It does not accurately identify the foreign application for patent or inventor's certificate on which priority is claimed pursuant to 37 CFR 1.55, and any foreign application having a filing date before that of the application on which

Art Unit: 3724

priority is claimed, by specifying the application number, country, day, month and year of its filing.

Specifically, the year listed for the "Date Filed" for the German application is inaccurate and it seems that it should read --2005--, not "2004."

(b) The clause regarding "willful false statements ..." required by 37 CFR 1.68 is incomplete.

(c) Non-initialed and/or non-dated alterations have been made to the oath or declaration; specifically to inventor "HOLTZMANN." See 37 CFR 1.52(c).

Claim Rejections - 35 USC § 112, 2nd paragraph

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claim 6 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6, lines 2-3, the recitation "has a length of at least 2 cm in a longitudinal direction of the saw blade" renders the claim vague and indefinite since the invention is being positively defined in terms of the saw blade which has not been positively set forth as part of the claimed invention.

Claim Rejections - 35 USC § 102

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

8. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Godfrey et al., pn 3,155,128.

Godfrey discloses a handheld power saw with every structural limitation of the claimed invention including:

a coupling means (e.g., 80) for retaining and driving a saw blade, and having a guide assembly (e.g., 88, 90) for guiding an oscillating motion of the saw blade, characterized in that the guide assembly includes at least one lateral bracing means (e.g., see Fig. 5) for shielding the coupling means from shear forces acting on the saw blade;

[claim 2] characterized in that the bracing means is intended for bracing on both sides against shear forces on the saw blade;

[claim 3] characterized in that the bracing means is embodied as a slide bearing;

[claim 5] characterized in that the bracing means forms a two-dimensional contact face.

Claim Rejections - 35 USC § 102/103

9. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3724

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

10. Claim 6 is rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Godfrey et al., pn 3,155,128.

Godfrey discloses a handheld power saw with every structural limitation of the claimed invention including:

[claim 6 (from 5)] characterized in that the contact face has a length of at least 2 cm in a longitudinal direction of the saw blade.

For example, providing the saw in a particular saw having the appropriate dimensions will result in the claimed contact face length.

In the alternative, if it is argued that Godfrey does not explicitly disclose the claimed length, to provide such a contact face length would be the mere discovery of the optimum or workable ranges within the general conditions of the prior art by routine experimentation and therefore obvious to one having ordinary skill in the art.
